

10" Nurse Control Panel

The statuses of all working Room Control Units assigned to the panel can be monitored actively. All errors and notifications are displayed on the information panel. Emergency codes, WC calls, nurse calls, and nurse presences can be monitored. All activities on the system are logged. All logs can be reported in detail. There is a configurable number of room monitoring icons on the interface. Call statuses are tracked in real time via these icons.

- Panel to room communication
- Panel to a group of rooms communication
- General call from rooms or nurse stations
- Full duplex
- SIP protocol
- PoE (Power Over Ethernet) or 110-240 V
- Conference call

- Access to patient info
- Call priority depending on level of urgency
- Automatic network checks
- Easy configuration
- As many call jumps as needed to other nurse stations or rooms
- Handset works as DECT wireless within 50m range

Technical Specification

ZKRUNCIPNCP10V

Screen	10.1" HD Capacitive Multi Touch Screen
Display Resolution	1280 x 800
Processor	QuadCore 1Ghz
Operating System	Android
RAM	1 GB DDR3 1066
Flash	4 GB
Weight	2 kg
Width	312 mm
Depth	32 mm
Height	187 mm
Language	English, Spanish, Russian, Turkish, Custom
Power Supply	110-240 V or PoE
Operating Temperature / Humidity	0°C +40°C / %10 %65 RH
Power Consumption	5W
Ports and Slots	1xPower In, 1xEthernet
