

### 7" Nurse Control Panel

The statuses of all working room control units assigned to the panel can be monitored actively. All errors and notifications are displayed on the information panel. Emergency codes, WC calls, nurse calls, and nurse presences can be monitored. All activities on the system are logged. All logs can be reported in detail. There is a configurable number of room monitoring icons on the interface. Call statuses are tracked in real time via these icons.

- Panel to room communication
- Panel to a group of rooms communication
- General call from rooms or nurse stations
- Full duplex
- SIP protocol
- PoE (Power Over Ethernet) or 110-240 V
- Conference call

- Access to patient info
- Call priority depending on level of urgency
- Automatic network checks
- Easy configuration
- As many call jumps as needed to other nurse stations or rooms

### Technical Specification

ZKRUNCIPNCP7V

Screen	7" TFT Capacitive Multi Touch Screen
Display Resolution	800 x 480
Processor	Freescale Core Quad 1Ghz
Operating System	Android
RAM	1 GB DDR3 1066
Flash	4 GB
Weight	1.8 kg
Width	255 mm
Depth	30 mm
Height	180 mm
Language	English, Spanish, Russian, Turkish, Custom
Power Supply	110-240 V or PoE
Operating Temperature / Humidity	0°C +40°C / %10 %65 RH
Power Consumption	5W
Ports and Slots	1xPower In, 1xEthernet, 1xHDMI Type A
