

Versatile 18.5" Nurse Control Panel

When a call is made, a text notification will appear on screen indicating the type and origin of the call, accompanied by an audio alert. The system uses call type priority while displaying notifications. Nurse calls, emergency calls, WC calls and nurse presences can be tracked on the panel simultaneously. The connectivity between units is maintained by a LAN. There is no limit on the number of rooms that can be connected to the Nurse Panel. All activities passing through the system are logged and can be reported in detail.

- 99.9% stable Linux-based OS
- Reliable database structure with MySQL
- Incoming calls are shown in order of priority
- Customizable audio alerts
- On screen real-time analysis of calls received and system error messages
- Text communication between Nurse Panels
- Call-forwarding to other Nurse Panels with Night Service feature
- Can have customized room names on display and in logs

Technical Specification

ZKRUNCIPNP17100

Screen	18.5 inch LED Display All in One PC
Display Resolution	1024 x 768
Processor	Intel Bay Trail J1750 2.41 Ghz Dual Core
Operating System	Linux OS
SSD	128 GB
Memory	4 GB
Weight	3.2 kg
Width	485 mm
Depth	39 mm
Height	336 mm
Language	English, Spanish, Russian, Turkish, Custom
Power Supply	110-240 V
Operating Temperature / Humidity	10°C +50°C / % 30 %80 RH
Storage Temperature / Humidity	20°C +60°C / %20 %90 RH
Ports and Slots	2xUSB 3.0, 1xVolume Button, 1xMic in, 1xSpeaker Out, 1xPower In, 1xEthernet
